

Weeds, ugh!

Have you been using Round-Up or other toxic chemicals to rid your driveway, walks and patio of weeds that just keep coming back no matter how often you treat them?

There is actually a cheaper and safer method! And, in addition, it is much more environmentally friendly. You simply mix 3 easy-to-find ingredients in a spray bottle and spray!!! The exact amounts of each are below. Spray the weeds early in the morning after the dew has evaporated and, by evening the weeds will be dead!

1-Gallon Vinegar

2-Cups Epson Salts

¼-Cup Blue Dawn Dish Soap
