

Keep Your Lawn Looking Green

For some, maintaining a green yard might be easy, while for many it can seem like a daunting task. With minimal time and effort, you can create a charming yard with curb appeal that will beautify your home and community.

Here are a few tips to keep a greener yard:

- Know your grass species and learn about care and maintenance specific to your type
- Mow regularly to boost and maintain your lawn's health
- Water enough to moisten the soil to a depth of 8 inches; don't overwater
- Treat lawn for weeds, bugs and insects
- Fertilize on a regular basis
