

## **Yard Clippings**

**It's February, are you ready to garden?**

**No?**

**Well, let's get going and ready to grow.**

**We are in gardening ZONE 5,  
Which means plants are getting ready to come alive,**

**We need to plan a strategy,  
to be ready to get down and dirty.  
We need to start preparing our equipment,  
which is always a good investment.**

**Tune up that mower,  
find shovels, rakes and hoes,  
tighten up those handles,  
wipe down all those tools,**

**Plant these vegetables  
after President's Day of course,  
for spring greens on your tables,  
and vitamins straight from the source.**

**Peas, carrots, green onion, cabbage, turnips,  
Radish, beets, lettuce, and parsnips,**

**All delicious way to go,  
For more info see the web links below.**
