

West Valley City Snow Removal Policy

West Valley City Public Works Department is responsible to remove snow from more than 800 lane miles of streets for safer travel. The City prioritizes snow removal as follows:

1. Main collector roads
2. Priority routes in subdivisions (red routes on the map)
3. Residential through streets (excluding cul-de-sacs)
4. Cul-de-sacs and dead-end roads

MAP OF SNOW REMOVAL ROUTES

Due to limited resources and depending on the storm, it could take 12-18 hours or more after a storm ends before a plow clears your road. If another storm passes comes before all the roads are cleared, the snow removal process starts over with the higher priority streets. **Please wait 24 hours after a storm ends to call and request plow service.**

During snow removal operations, each West Valley City resident plays a role in helping to keep roads and sidewalks free of snow and ice. Listed below are reminders for all residents:

The following actions are not permitted:

- Parking on city streets during a snowstorm or during the 24 hours after the end of the storm. (*Police officers are authorized to cite residents if they are not in compliance with any ordinance*).
- Blowing or pushing snow into city streets.

Homeowner Responsibilities:

- Clearing snow from sidewalks in front of their homes within 24 hours of a storm. (*Please help your neighbors*)
- Clearing snow in front of your mailbox after plows have been through the neighborhood.
- Removing the snow from around a fire hydrant. If there is a fire hydrant in front of your home, you need to help keep the hydrant accessible to the Fire Department.
- Clearing snow from driveway approaches. Snow accumulated on the plow blade will be pushed onto the side of the road including in front of driveway approaches. We cannot respond to requests to clear driveway approaches of snow pushed from the roadway.

Streets Cleared by UDOT

- 3500 South
- Redwood Road
- 5600 West
- 5400 South
- SR-201
- I-215
- SR-111 (Bacchus Highway)
- Mountain View Corridor
